About ColorStack

ColorStack is a 501(c)(3) nonprofit with the mission to increase the number of Black and Latinx Computer Science graduates that go on to start rewarding technical careers.

Launched in 2020 and led by Founder Jehron Petty, a 2020 Computer Science graduate from Cornell University, we're the home for Black and Latinx college Computer Science students to find confidence, community, and career development.

About Our Chapter

ColorStack at Carnegie Mellon University is dedicated to building a thriving community for Black and Latinx students pursuing careers in computing.

Halted by the pandemic and revived in 2022, through professional development, peer mentorship, academic support, and meaningful industry partnerships, we empower members to excel both inside and outside the classroom.

As one of the nation's leading computer science institutions, our chapter connects that talent with employers committed to building strong technical teams of different backgrounds.
